

The fontawesome package

High quality web icons

Version 4.2, released on November 6, 2014

Abstract

The fontawesome package grants access to 479 web-related icons provided by the included *Font Awesome* free font, designed by Dave Gandy and released¹ under the open SIL Open Font License².

This package requires the fontspec package and either the Xe \LaTeX or Lua \LaTeX engine to load the included otf font.

1 Introduction

The fontawesome package aims to enable easy access in \LaTeX to high quality icons covering [web application](#), [file type](#), [spinner](#), [form control](#), [payment](#), [chart](#), [currency](#), text editor, [directional](#), [video player](#), [brand](#) and [medical](#) pictograms. It is a redistribution of the free (as in beer) *Font Awesome* otf font with specific bindings for \LaTeX .

2 Requirements

The fontawesome package requires the fontspec package and either the Xe \LaTeX or Lua \LaTeX engine to load the included otf font.

3 Usage

`\faicon` Once the fontawesome package loaded, icons can be accessed through the general `\faicon`, which takes as mandatory argument the *<name>* of the desired icon, or through a direct command specific to each icon. The full list of icon designs, names and direct commands are showcased next.
