The **fontawesome** package
High quality web icons

Xavier Danaux[*](LaTeX code)
Adrien Schildknecht[†](updates)
Dave Gandy (font and icons design)

Version 3.1.1, released on May 10, 2013

Abstract

The fontawesome package grants access to 439 web-related icons provided by the included *Font Awesome* free font, designed by Dave Gandy and released[1] under the open SIL Open Font License[2].

This package requires the fontspec package and either the X∃(LA)TEX or Lua(LA)TEX engine to load the included otf font.

1 Introduction

The fontawesome package aims to enable easy access in (LA)TEX to high quality icons covering web application, file type, spinner, form control, currency, text editor, directional, video player, brand and medical pictograms. It is a redistribution of the free (as in beer) *Font Awesome* otf font with specific bindings for (LA)TEX.

2 Requirements

The fontawesome package requires the fontspec package and either the X∃(LA)TEX or Lua(LA)TEX engine to load the included otf font.

---

[*]E-mail: xdanaux@gmail.com
[†]E-mail: adrien+dev@schischi.me
[1]See http://fortawesome.github.com/Font-Awesome for more details about the font itself
[2]Available at http://scripts.sil.org/OFL.

3 Usage

Once the fontawesome package loaded, icons can be accessed through the general \faicon, which takes as mandatory argument the ⟨*name*⟩ of the desired icon, or through a direct command specific to each icon. The full list of icon designs, names and direct commands are showcased next.

3.1 Web application icons
